### DETAILED ACTION

1. Applicant's preliminary amendment received March 21, 2002 is acknowledged.  
Claims 9-15, 17-20, 22, 23, 25-28, 30, and 31 have been cancelled.  
Claims 1-8, 16, 21, 24, and 29 are pending in this application.

### *Election/Restrictions*

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3, 6-8, and 24, drawn to methods of inhibiting FcεRI expression by administering nucleic acids.

Group II, claims 1, 4-8, and 24, drawn to methods of inhibiting FcεRI expression by administering peptides.

Group III, claims 16 and 21, drawn to methods of screening for agents that modulate FcεRI expression.

Group IV, claim 29, drawn to a method of diagnosing an IgE mediated condition in a patient.

3. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature that links all of applicant's inventions is the disclosure that variant FcεRIβ polypeptides can alter expression of the FcεRI receptor. Cookson et al.

teach that variant Fc $\epsilon$ RI $\beta$  sequences can be used in screening assays to diagnose atopy (an IgE mediated condition) and that antisense and antibody molecules specific for an Fc $\epsilon$ RI $\beta$  variant disclosed by Cookson et al. are to be used to reduce the expression of Fc $\epsilon$ RI that contain the variant chain (WO 97/08338, see entire document, particularly the abstract and the paragraph that spans pages 10 and 11). As such, applicants technical feature does not make a contribution over the art of Cookson et al., and therefore applicant's instant inventions have been found to lack unity of invention.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Szperka whose telephone number is 571-272-2934. The examiner can normally be reached on M-F 8:30-5:00.
